

CS 1301 – Fall 2008

Homework 2 – Mom, Python's making faces at me!

Due: Friday, Aug 29th at 6 PM

Out of 100 points

Files to submit: 1. face.py

For Help:

- TA Helpdesk – Schedule posted on class website.
- Email TAs

Notes:

- **Don't forget to include the required comments and collaboration statement (as outlined on the course syllabus).**
 - **Do not wait until the last minute** to do this assignment in case you run into problems.
 - If you find a significant error in the homework assignment, please let a TA know immediately.
-

Part 1 – Myro Intro

So you're sitting there, looking at your Python window, and you find it to be, well, impersonal. So why don't we add a little personality to it? How about...a face!

Hey! That looks much friendlier. And you can do it all with python! Specifically, that infamous myro thing you've installed. Myro contains a multitude of commands for programming your robot. See the documentation here:

[http://wiki.roboteducation.org/Myro Reference Manual](http://wiki.roboteducation.org/Myro_Reference_Manual)

For this assignment, we will be focusing on the graphics aspect of myro, so you won't

need your robot. Both the link given above, as well as the PDF for the Myro Graphics Reference will be rather helpful.

Part 2 – Making the Face

Your mission, should you choose to accept it (and we recommend that you do), is to make a face in Python. You need to create a program that initializes a graphics window, and draws the face. When you are done, save your program as “face.py”. **Make sure that your filename matches this exactly, or you will lose points!**

The face should contain:

- A Head
- 2 Eyes
- A Nose
- A mouth
- At least 2 different colors

Try to keep things in a general face alignment here (Sorry to all you budding Picassos out there), but the shapes can be whatever you want. Be creative!

Part 3 – Turning it in

Once you're done, please submit face.py to T-Square. The assignment is due Friday, August 29th at 6pm. If you're late, but turn it in before 6pm on Monday, you will lose 10%. We will not accept submissions after Monday.

Note that all submissions to T-Square are FINAL! If you are not done, use the “draft” option. Don't hit submit until you are sure your face.py file meets all of the requirements of this homework assignment.

Part 4 – Grading Rubric

File named correctly (face.py) – 10 points
Creates a graphics window – 20
Draws a head – 12
Draws 2 eyes – 12
Draws a nose – 12

Draws a mouth – 12

Uses at least 2 different colors - 12

The facial features are properly aligned – 10

Total: 100

You can earn up to 5 points bonus [discretion of the TAs] for extra creativity/general awesomeness, for a possible total of 105/100.
